OBJECTIVES

Skill want to jump deep into AI and build new, exciting AI products. I learn fast, love creating under top experts, and turn ideas into real apps quickly.

PROJECTS

- **Academix - School Management System (Full Stack Project – PHP, MySQL)**

PHP | MySQL | HTML | CSS | JavaScript | Razorpay | XAMPP | CRUD Operations | Authentication | Full Stack Development

- An academic project that manages students, teachers, attendance, fees, and notices with secure login, password reset, and a responsive dashboard. Integrated Razorpay for online fee payments and enabled PDF/Excel export for reports.

- **Fake News Detection System**

Python | Pandas | NumPy | Scikit-learn | Logistic Regression | Natural Language Processing (NLP) | TF-IDF Vectorization | Machine Learning

- Developed a Fake News Detection System using Machine Learning and NLP techniques.
- Used TF-IDF Vectorization and Logistic Regression to classify news as real or fake.
- Performed text preprocessing and model training for accurate prediction.
- Created a simple interface for instant fake news detection.

- **Distance Measurement System for Blind Assistance**

Arduino | IoT | Ultrasonic Sensor | LCD Display | Buzzer | Embedded Systems | Arduino IDE | C/C++

- Developed an IoT-based smart alert system using ultrasonic sensors for obstacle detection.
 - Used Arduino, buzzer, LED, and LCD display to provide distance alerts for visually impaired users.
 - Designed a three-zone alert mechanism for improved safety and navigation assistance.
-

EDUCATION

Integrated Master of Science in Information Technology

2022 – Present

K. S. School of Business Management & Information Technology, Ahmedabad

4.14/5

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, PHP
- **Programming Languages:** C, C++, Java, Python,
- **Machine Learning:** Pandas, NumPy, Regression, Classification
- **Database:** MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Power BI
